

*"I enjoy the online
course work. I can
hop on when it is
convenient for me."
—The Netherlands*

take your career & your organization to the next level **online!**

If you are a food industry professional, importer, exporter, distributor, student, attorney, scientist, or government employee engaged in food science or regulation—or if you are involved in consumer food affairs, purchasing, marketing, product development or quality control—knowledge of changing regulatory requirements in the food trade is essential to your career advancement and to the compliance and competitive advantage of your company or organization.

Whether you live a few miles or 10,000 miles from the Michigan State University campus, this program offers you the opportunity to advance your knowledge online—without leaving your home or office. Certified professionals can satisfy required continuing education or CLE credits with these courses.

These courses are taught by food science and legal professionals who understand the legal complexities of the flow of food and agricultural products across borders.

MICHIGAN STATE
UNIVERSITY

Are you and your organization on target with food laws?

The **Institute for Food Laws and Regulations** at Michigan State University can keep you and your organization up-to-date on ever-changing food laws and regulations with:

- **The latest information** on the food laws of the United States, Canada, European Union, Latin America, Asia, Codex Alimentarius, OIE and IPPC.
- **Links to Internet sources** of valuable information
- **Interaction** with fellow participants from around the world
- **Online courses*** delivered to your computer in your home or office

**No on-campus residency requirements and no books need to be purchased—the latest information is on the Internet.*

*"I liked the applicability of
the facts conveyed to us.
I made sure I understood
every topic in the module.
I can assure you that I am
applying the knowledge in
my work."*

—Kenya

the expertise you want  **when & where you want it**

 **Benefits for you & your organization**

- Participation in an international network of food regulation professionals
- Obtain global perspectives on international food trade
- Make personal contacts with key policy figures in your region(s) of study
- Prepare for expansion into new markets
- Understand critical domestic and international regulatory issues
- Obtain information on the legal requirements for the production, distribution, and sale of genetically modified organisms, dietary supplements, labeling for exports and novel processing techniques i.e., food irradiation
- Obtain specific information on HACCP/ISO issues
- The most comprehensive program in international food laws available to professionals anywhere
- Extensive expertise of MSU faculty and international experts
- Study at your convenience—when and where it fits into your busy personal/professional life.
- Online courses beginning each spring and fall semester and lasting 12-15 weeks
- State-of-the-art distance education electronic communication tools
- Classes taught *completely* over the Internet and require only a computer, Internet connection, and 9-12 hours per week per course. No books or other materials are needed.
- International-specific courses:
 - *An overview course in International Food Laws & Regulations, Codex Alimentarius, OIE (Animals) and IPPC (Plants)*
 - *Region-specific: European Union, Latin America, Asia*
 - *Country-specific: United States, Canada*
- The interdisciplinary nature of each course integrates historical, social, economic, cultural, and scientific elements.
- Each course provides students with the competencies necessary to initiate business relationships within their region(s) of study
- The program provides a thorough understanding and appreciation of the food laws and regulations in each region studied.

“Discussions with individuals from different positions in the food industry and from other countries bring international food laws to life.”

—New Zealand
